To Whom It May Concern

I am pleased to write this letter of recommendation for **Mr. Arman Hossen**, who earned his Bachelor of Science in Applied Mathematics from Noakhali Science and Technology University (NSTU) with a CGPA of 3.65 out of 4.00. I taught him in several rigorous courses, including **Stat Lab**, **Integral Equations**, and **Thermodynamics and Statistical Mechanics**.

In addition to his coursework, I had the privilege of supervising his undergraduate research project titled *"Mathematical Statistics Approach to Evaluate the Effect of Volunteering on Higher Studies at NSTU."* In this project, Arman applied statistical modeling and quantitative analysis to examine the relationship between student's volunteering activities and their academic progression in higher studies. He demonstrated strong research capability, proficiency in statistical tools with logical reasoning. Throughout his academic journey, he consistently displayed analytical strength, intellectual curiosity, and dedication. His performance in theoretical and applied mathematics courses showcased his mathematical maturity and problem-solving skills.

Beyond academics, Arman was an active member of the **NSTU Math Club**, **NSTU Debating Society**, and **NSTU Science Club**. His engagement in these organizations highlights his leadership qualities, communication skills, and commitment to intellectual and personal growth.

I am confident that his strong foundation in mathematics, along with his research experience and extracurricular involvement, makes him well-prepared for postgraduate studies in mathematical sciences, statistics, data analytics, or data science. He has my highest recommendation for admission, and I am certain he will be a valuable asset to your institution. Please feel free to contact me for any further information. I wish him every success in his future endeavors.

Yours Sincerely

Jannatul Naime
Assistant Professor
